Past Recorder Privacy Policy

March 8, 2017

TL;DR

- We do not collect anything.
- We cannot collect anything (as the app has no internet access).
- We have no intention or need to collect anything.
- We have no ads.

Thank you for downloading Past Recorder ("PR", "Application"). The app is developed by Ajeera Apps ("AA", "we", "us", or "our"). PR allows users to persist up to 10 minutes of audio recorded by your mobile device`s microphone, save your recordings and optionally share them via other apps.
It is our policy to respect your privacy, and the privacy of all users of the app.

If you have any questions about the Policy, please contact Ajeera Apps at:
ajeeraapps@gmail.com

No Collection of Personal Information

Ajeera Apps does not gather any of your personal information whatsoever while you are using the Application.
Under no circumstances does AA collect, download or otherwise make copies of any recordings you make using the Application (hereinafter "Recordings") and any reference to personal information in the present Policy does not include Recordings, or any personal information about you or any third party included in the Recordings.

No Information Transfer

The Application does not collect, does not store locally on your device, and does not send to our servers any personal information from the Application. If you choose, you may share data between the Device and other devices using the Application's Share function.

No Gathering of Information for Statistical Purposes

PR does not automatically collect any information using third-party programs to help us understand how our users use the Application, or for any other reason. PR does not use Google Analytics, Flurry or any other similar services to collect such information.

Non-disclosure of Personal Information

We do not collect, store or gather any personal information - therefore PR also does not divulge, or sell any personal information to any third parties.

Permissions

The following is a complete listing and description of what functions on the Device are accessed and / or modified by the Application:

RECORD_AUDIO - Allows the Application to make recordings using the microphone.

READ/WRITE_EXTERNAL_STORAGE - Allows the Application to write to the USB storage and / or SD card.
